

Engineered for the Essentials. SDKF: The Compact Lever Connector.

True efficiency is using exactly what's needed. While others offer one-size-fits-all, we offer the perfect fit. The SDKF is our dedicated specialist for all 2.5 mm² applications. It's leaner, smarter, and engineered for the reality of your daily work. Don't pay for capacity you don't use.

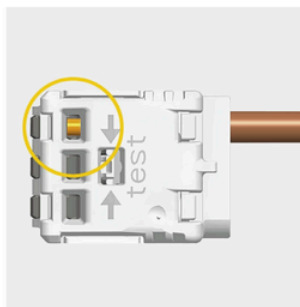

Why 4 mm², when 2.5 mm² is enough?

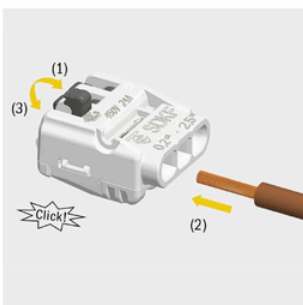

Testing

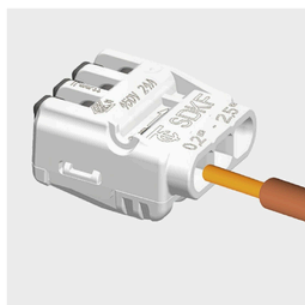

Gauge wire stripping length

Control window for correctly stripped and pushed-in wires

For flexible wires open / close the release lever completely

For solid wires it is not necessary to open the lever before pushing in the wire
